Plan to change the playing fields to a Town Green

Why we are asking for the playing fields to be changed into a town green:-

- Provide major benefits to the local residents - health, well-being, enjoyment etc
- No affect on existing infrastructure - trees stay where they are etc
- Area already used to local residents for over 20 years - estimate well over a thousand uses per month
- The town green area is accessible, less than a few hundred yard, to local residents in Snapethorpe/Lupset
- Safe play area for children and families
- There are no other town green areas, less than a few hundred yards, for local residents in Snapethorpe/Lupset
- The area is not really changing use as it is already a playing field
- The area can be used for a large number of sports and leisure activities, e.g. picnics, walks, nature trails, bonfires, fireworks, Easter egg hunts etc
- The area is also fully accessible by the school
- Minimal cost to make the area into a town green
- Good access - entrances via Airedale Heights, Dacre Field, St Georges Road and from Broadway (through the site of the Redoubt building)
- As its used for sports events then should have changing facilities - can be provided on the site of the Redoubt building
- For visiting teams car park can be provided on site of Redoubt building
- Meets the National/Council's policies:-
 - provide health and recreation benefits to people living and working nearby
 - have an ecological value and contribute to green infrastructure
 - being an important part of the landscape and setting of built development
 - for the provision of recreational facilities and open space
 - retain or enhance existing recreational and amenity assets, or lead to the provision of additional high quality assets.
